07 June 2026

Dear Hiring Manager,

I am writing to express my strong interest in a Senior iOS Developer position at your organization. With over 8 years of hands-on experience designing, developing, and delivering high-quality iOS applications across B2B, B2C, and enterprise domains, I am confident in my ability to make an immediate and lasting impact on your team.

Throughout my career, I have developed deep expertise in Swift, SwiftUI, and Objective-C, complemented by strong command of frameworks such as Core Data, Firebase, Realm, MapKit, AVFoundation, CoreML, and ARKit. I am well-versed in integrating third-party APIs including Agora, Google Analytics, and Stripe, and have successfully implemented real-time communication features using Socket.IO and Apple Push Notifications. My experience spans the full SDLC within Agile/Scrum environments, and I take pride in maintaining clean, testable code with XCTest and XCUITest automation.

In my current role at Software Engineering Gurugram, I led the development of a macOS diagnostics application and implemented comprehensive UI automation and functional testing for multiple iPhone and iPad apps. Previously at Deftsoft Informatics, I engineered the Moocher social networking app — featuring real-time chat, video/audio calling via Agora, and geolocation-based matchmaking — as well as a PDF scanner app with OCR, translation, and math-solving capabilities. These projects reflect my ability to architect scalable MVVM solutions, meet tight deadlines, and deliver polished App Store releases.

Beyond technical execution, I bring leadership experience and strong communication skills that enable me to collaborate effectively with cross-functional teams, mentor junior developers, and drive projects from conception to deployment. I have a proven track record of adhering to Apple Human Interface Guidelines and navigating the App Store submission process with precision.

I am excited about the opportunity to bring my experience, passion for mobile development, and commitment to quality to your team. I would welcome the chance to discuss how my background aligns with your goals. Thank you for your time and consideration.

Sincerely,

Amarendra Baitha

Senior iOS Developer
